

FIONA'S BIRTHDAY BASH

Let's Party and Cure Bladder Cancer

Purdue Small Animal Clinic is known for their research and Dr. Knapp is leading the charge for finding a cure for bladder cancer. The little girl in the above picture is living proof of their abilities and determination to find a cure. And we are here to help.

Each year, we host a birthday party show-n-go fundraiser to help a worthy dog related cause. Curing K9 bladder cancer is now our top priority. All proceeds from this event goes to Dr Knapp for her research. This year Pawsitive Partners has graciously offered to host this event. Make plans to spend the day playing, learning and relaxing with your fur kids (and cure cancer)

Check back often and send me an email to add you to the update list. More information is coming out daily.
